# Contents

face	
I. Gei	neral Introduction
II. Ca <sub>l</sub>	pillarity
1.	Surface Tension and Surface Free Energy
	The Young-Laplace Equation
	Some Experiments with Soap Films
	The Treatment of Capillary Rise
	A. Introductory Discussion
	B. Exact Solutions to the Capillary Rise Problem
	C. Experimental Aspects of the Capillary Rise Method
5.	The Maximum Bubble Pressure Method
6.	Detachment Methods
	A. The Drop Weight Method
	B. The Ring Method
	C. Wilhelmy Slide Method
7.	Methods Based on the Shape of Static Drops or Bubbles
	A. Pendant Drop Method
	B. Sessile Drop or Bubble Method
	C. Sources of Other Deformed Shapes
8.	Dynamic Methods of Measuring Surface Tension
	A. Flow Methods
	B. Capillary Waves
	C. Maximum Bubble Pressure Method
9.	Surface Tension Values as Obtained by Different Methods
10.	Problems
	General References
	Textual References

viii CONTENTS

III. The Nature and Thermodynamics of Liquid Interfaces	48
1. One-Component Systems	48
A. Surface Thermodynamic Quantities for a Pure Substance	48
B. The Total Surface Energy, $E^S$	51
C. The Effect of Curvature on Vapor Pressure and Surface	
Tension	53
D. The Effect of Pressure on Surface Tension	55
2. Structural and Theoretical Treatments of Liquid Interfaces	56
A. Further Development of the Thermodynamic Treatment of	
the Surface Region	58
B. Calculation of the Surface Energy and Structure of	•
Interfaces	61
3. Orientation at Interfaces	63
4. The Surface Tension of Solutions	65
A. Binary Solutions	65
B. The Surface Tension of Polymeric Systems	69
5. The surface relation of Posymetre Systems: The Gibbs Equation	71
A. Definition of Surface Excess	71
B. The Gibbs Equation	73
C. The Dividing Surface	74
D. Other Surface Thermodynamic Relationships	76
6. Determination of Surface Excess Quantities	77
A. Experimental Methods	77
B. Historical Footnote and Commentary	79
C. Theoretical Calculation of Surface Excess Quantities	79
7. Gibbs Monolayers	80
A. The Two-Dimensional Ideal-Gas Law	82
B. Nonideal Two-Dimensional Gases	83
C. The Osmotic Pressure Point of View	86
D. Surface Elasticity	89
E. Traube's Rule	90
F. Some Further Comments on Gibbs Monolayers	91
8. Problems	92
General References	96
Textual References	96
Textual References	90
TV/ Change of Till and Till all Call advantage	101
IV. Surface Films on Liquid Substrates	101
1. Introduction	101
2. The Spreading of One Liquid on Another	104
A. Criteria for Spreading	104
B. Empirical and Theoretical Treatments	107
C. Kinetics of Spreading Processes	110
D. The Marangoni Effect	111
E. Lenses-Line Tension	112
3. Experimental Techniques for the Study of Monomolecular	
Films	113
A. Measurement of $\pi$	114
B. Surface Potentials	116

CO	דיז	וכדי	רד	rc.
$\mathbf{c}$	N	. CI	N	ıs

ix

	C. Measurement of Surface Viscosity	118
	D. Optical Properties of Monolayers	126
	E. Microscopic Evaluation of Monolayers	128
	F. Diffraction Studies	130
4.	States of Monomolecular Films	131
	A. Gaseous Films	131
	B. Gas-Liquid Transitions	132
	C. Condensed Phases	133
	D. The Solid State	135
	E. Monolayer Collapse	136
	F. Domain Shapes and Interactions	136
	Mixed Films	140
	Evaporation Rates through Monomolecular Films	146
	Dissolution of Monolayers	148
8.	Reactions in Monomolecular Films	151
	A. Kinetics of Reactions in Films	151
	B. Kinetics of Formation and Hydrolysis of Esters	152
	C. Other Chemical Reactions	155
9.	Problems	156
	General References	158
	Textual References	158
<b>V</b> / <b>T</b> 21-	eduical Associate of Courte on Chambridge	169
	ctrical Aspects of Surface Chemistry	
	Introduction	169
	The Electrical Double Layer	169
	The Stern Layer	175
	The Free Energy of a Diffuse Double Layer	179
	Repulsion between Two Planar Double Layers	180
6.	The Zeta Potential	183
	A. Electrophoresis	183
	B. Electroosmosis	185
	C. Streaming Potential	187
	D. Sedimentation Potential	188
	E. Interrelationships in Electrokinetic Phenomena	188
	F. Potential, Surface Charge, and Colloidal Stability	189
7.	Electrocapillarity	192
	A. Thermodynamics of the Electrocapillary Effect	195
	B. Experimental Methods	197
	C. Results for the Mercury-Aqueous Solution Interface	199
	D. Effect of Uncharged Solutes and Changes of Solvent	200
	E. Other Electrocapillary Systems	202
8.	The Electrified Solid-Liquid Interface	202
	A. Electrode–Solution Interface	203
	A. Electrode-Solution Interface  B. Electrochemistry in Dispersed Phases	203 204
	A. Electrode-Solution Interface	203
9.	A. Electrode-Solution Interface  B. Electrochemistry in Dispersed Phases  C. Photoelectrochemistry; Solar Energy Conversion  Types of Potentials and the Meaning of Potential Difference	203 204
9.	A. Electrode-Solution Interface	203 204

X

		B. Volta Potentials, Surface Potential Differences, and the
		Thermionic Work Function
		C. Electrode Potentials
		D. Irreversible Electrode Phenomena
	10.	Problems
		General References
		Textual References
VI.	Lor	ng-Range Forces
		Introduction
		Forces between Atoms and Molecules
	3.	Long-Range Forces
		A. The Microscopic Approach
		B. The Retarded Dispersion Interaction
		C. Experimental Measurements
	4.	Long-Range Forces in Solution
		A. Dispersion Forces in Condensed Media
		B. Electric Double-Layer Repulsion
		C. Forces Due to Solvent Structure
		D. Thin-Film Viscosity
	5.	Forces in Biological Systems
	6.	The Disjoining Pressure
	7.	Anomalous Water
	8.	Dipole-Induced Dipole Propagation
		Problems

ΊΙ.	Sur	faces of Solids
	1.	Introduction
		A. The Surface Mobility of Solids
		B. Effect of Processing on the Condition of Solid Surfaces
	2	Thermodynamics of Crystals
		A. Surface Tension and Surface Free Energy
		B. The Equilibrium Shape of a Crystal
		C. The Kelvin Equation
	2	Theoretical Estimates of Surface Energies and Free Energies
	٥.	A. Covalently Bonded Crystals
		B. Rare-Gas Crystals
		C. Ionic Crystals
		D. Molecular Crystals
		E. Metals
	4.	Factors Affecting the Surface Energies and Surface Tensions of
		Actual Crystals
		A. State of Subdivision
		B. Deviations from Ideality
		C. Fractal Surfaces
		D. Dislocations

	5. Experimental Estimates of Surface Energies and Free E	inergies 278
	A. Methods Depending on the Direct Manifestation of	Surface Tensional
	Forces	
	B. Surface Energies from Heats of Solution	
	C. Relative Surface Tensions from Equilibrium Crystal	
	•	
	Shapes	
	D. Dependence of Other Physical Properties on Surface	
	Changes at a Solid Interface	
	6. Reactions of Solid Surfaces	282
